

“Our IT world is ever changing, but when it comes to office work, there is currently one constant: Microsoft 365. But how can you add functionality and still meet European security standards? At H&S, we have the tools to create a common data space where all your deployed cloud as well as on premise products manage your data securely, creating a central file location.”

Martin Leitner - CEO Heilig & Schubert Software AG

MICROSOFT 365 ADD-ONS

Make your office applications more productive and effective with our innovative Microsoft 365 add-ons. Store, manage and share business processes and documents, focused in a central data room, faster and easier than before.

CENTRAL LOCATION

AUDIT-PROOF STORAGE

INDIVIDUAL ACCESS CONTROL

OUR ADD-ONS

inPoint Teams Online Archiving (TOA)

Cloud-based archiving solution, which offers legally compliant storage and management of Microsoft Teams communication & files.

inPoint Content Server Exchange (CSE)

Email archiving for all requirements. Relieve your Exchange Server of emails that are no longer needed, in compliance with legal retention periods.

inPoint Cloud Sync

Central storage location, for safe and effortless synchronization. Connect collaboration tools like SharePoint or OneDrive with the strategic storage by inPoint.

inPoint Sync & inPoint Office

Your integration with MS File Explorer as well as MS Outlook, Word and Excel. All common Office programs focused on one single platform.

PRODUCT HIGHLIGHTS

Data room

for clients and projects

- ✓ Have a data room with a secure long-term archive and retention time management.
- ✓ Extend your data room with master data and documents from other applications.

Data sovereignty

within your company

- ✓ Alternatively, keep the data not in Azure, but in the sovereignty of your company.
- ✓ Use our lifecycle management tool to control where and for how long data, which is generated within M365 is, stored.

Collaboration tool

with access management

- ✓ Give your employees the full functionality of M365 collaboration without the risk of losing control over your data.
- ✓ Grant external partners access to the data room or digital customer files via 2-factor authentication.

CUSTOMER PROFILE

IT/Security administrator of small and mid-sized companies.

Department leaders for bigger accounts or companies.

Enterprise customers with legal responsibility of proof of disposal.
